- Time Management
- Problem Solving
- Adaptability

PROFILE

I'm a 23-year-old Full Stack Developer specializing in mobile and web applications. I develop Android mobile applications, websites, and backend systems. I edit photos and videos, and create traditional hand-drawn art and sketches. I have experience with programming languages and frameworks such as ReactJS, NextJS, React Native, Java, Kotlin, HTML, CSS, JavaScript, TypeScript, Python, C#, and Tailwind CSS. I can adapt, am flexible, and am willing to learn new technologies to expand my knowledge.

WORK EXPERIENCE

- **Holy Child College of Davao** 2019 - 2020
180 hours Work Immersion
 - Created traditional hand-drawn animations using frame-by-frame techniques with light box equipment.
 - Developed rotoscope-style animations by tracing specific character designs frame by frame on paper to produce smooth animated sequences.
- **EonBotz Technology** 2026 OJT INTERN
Developer 486 hours
 - Developed and maintained multiple internal desktop and web-based systems including an Inventory Management System, Library Management System, Property Management System, and a POS application.
 - Assisted in system configuration, environment setup, and deployment of internal tools used across the organization.

PROJECTS

- **Holy Cross of Davao College**
Full-Stack Developer
Scrappix: AI-Powered Recycling and Repurposing for Filipino Households (Capstone Project)
 - Developed a mobile app using camera scanning technology to identify household recyclable materials and suggest repurposing methods to reduce waste, fostering sustainable habits and economic empowerment.
- **Inventory Management System** (OJT Project)
 - Developed a full-stack inventory management system for internal use, enabling real-time tracking of stock, product records, and inventory movement across the organization.
- **PetShop POS** (OJT Project)
 - Built a Windows Forms desktop Point-of-Sale application in C# with MySQL, featuring SKU-based product lookup, billing management, PDF receipt export, discount handling, and a customer-facing display screen.
